

# Flood Forecasting Resiliency Model of the Upper St. Johns River Basin

Pete Singhofen (SLT)/Yanbing Jia (SJRWMD)

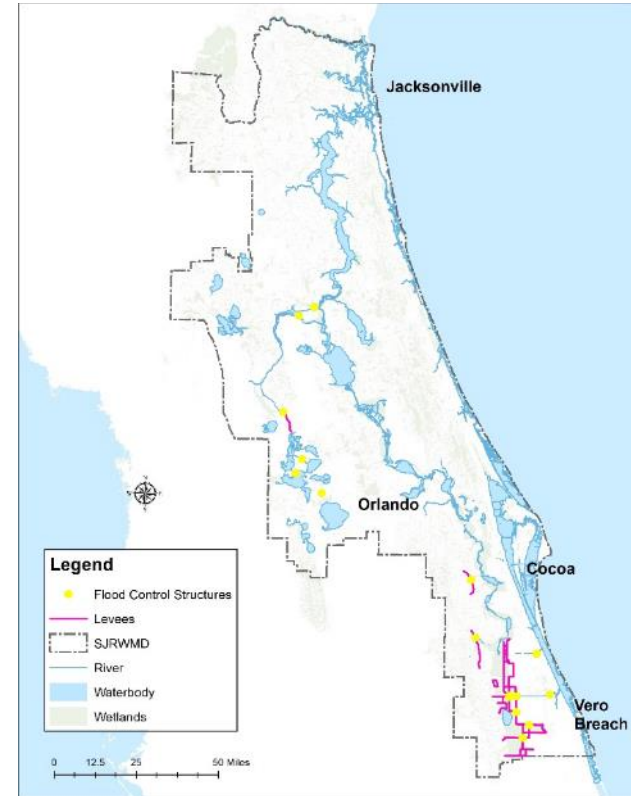

**St. Johns River**  
Water Management District

**STREAMLINE**  
TECHNOLOGIES

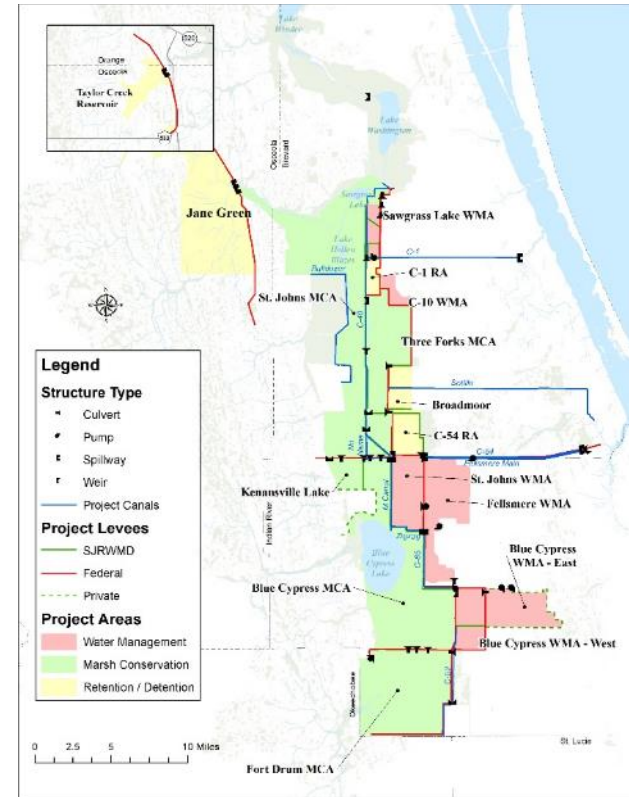

# SJRWMD Flood Protection

- ▶ Provide flood protection to headwaters and downstream
- ▶ Operate and maintain federal and non-federal flood control projects
- ▶ Support other core missions

# Upper St. Johns River Basin Project

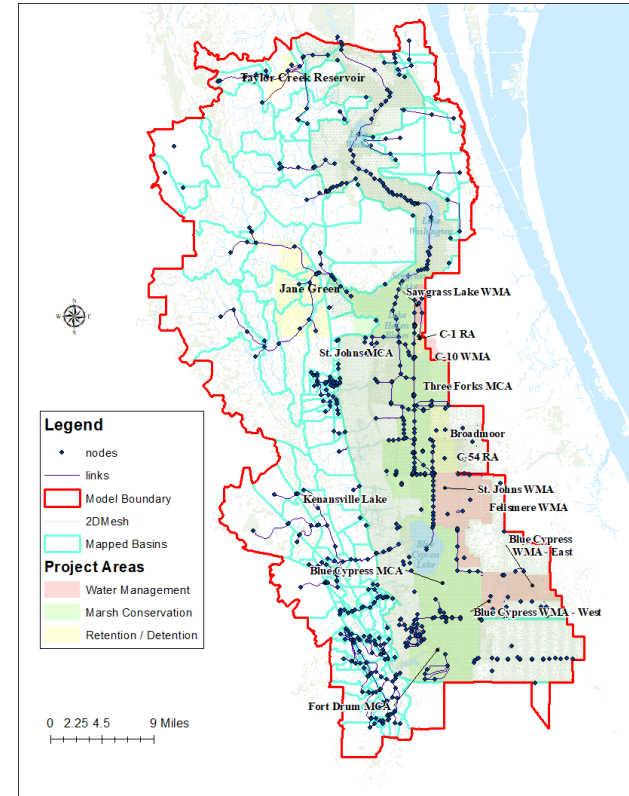

- ▶ Project covers 160,000 acres and includes over 100 miles of levees and dozens of water control structures
- ▶ Multiple benefits including flood protection, water quality improvement, wetland enhancement, and reduction of freshwater discharge to Indian River Lagoon

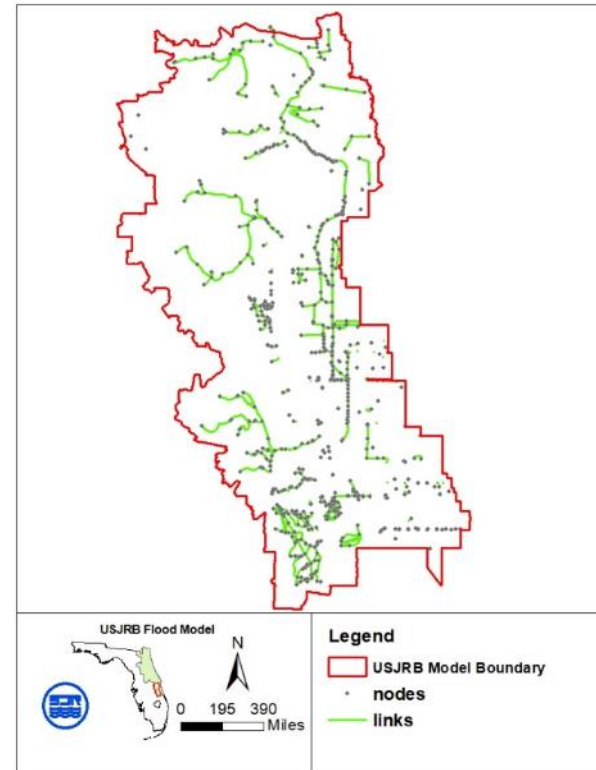

# Flood Forecasting Resiliency Model

- ▶ Initially developed by Streamline Technologies, Inc.
- ▶ Updated by SJRWMD
  - ▶ Refinement of model grid and representation of structures and operations
  - ▶ Model domain extended to downstream areas
  - ▶ Additional calibration and validation

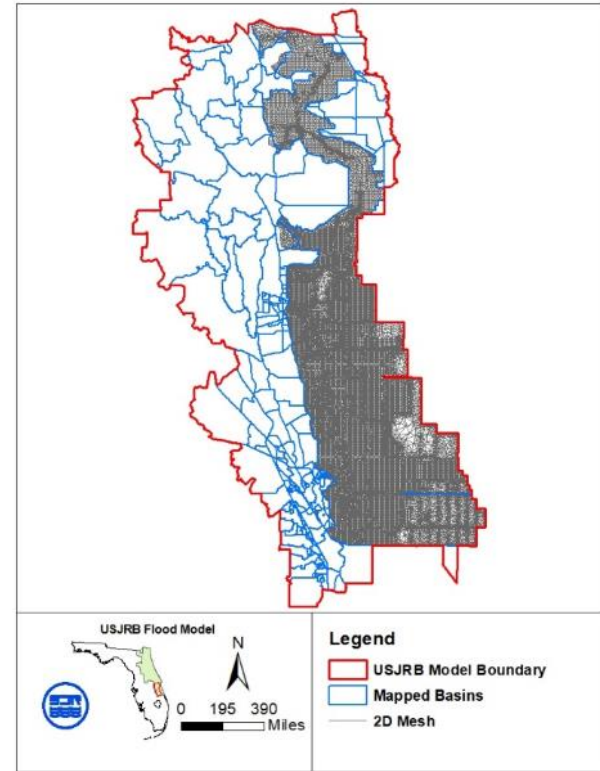

# Model Development

- ▶ Combination of 1D and 2D Overland Flow
- ▶ 2D Surface Region
  - ▶ Land Cover / Land Use
  - ▶ Soil Type
  - ▶ Lidar-based DEM
  - ▶ Nexrad Rainfall
  - ▶ Control Volumes
  - ▶ Weir Features

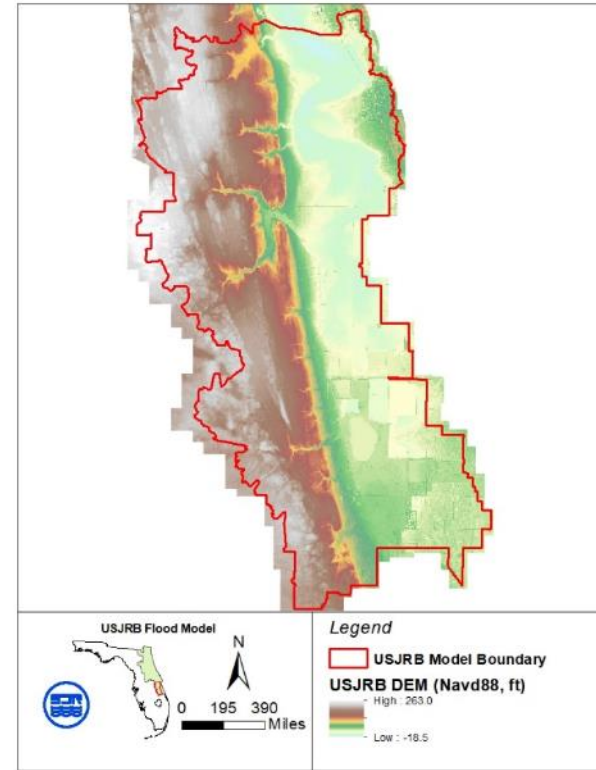

# Model Development

- ▶ Combination of 1D and 2D Overland Flow
- ▶ 2D Surface Region
  - ▶ Land Cover / Land Use
  - ▶ Soil Type
  - ▶ Lidar-based DEM
  - ▶ Nexrad Rainfall
  - ▶ Control Volumes
  - ▶ Weir Features

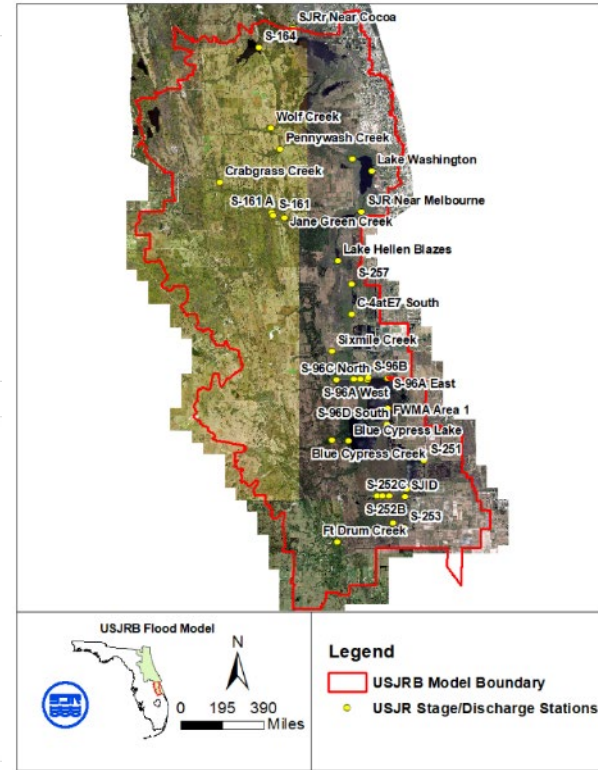

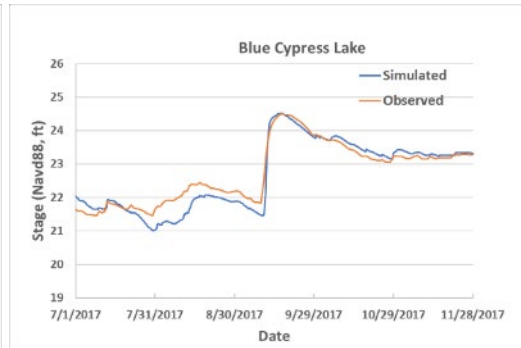

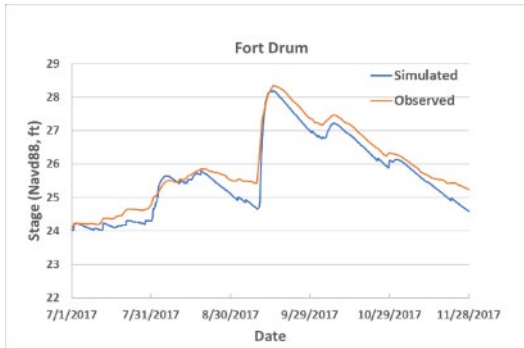

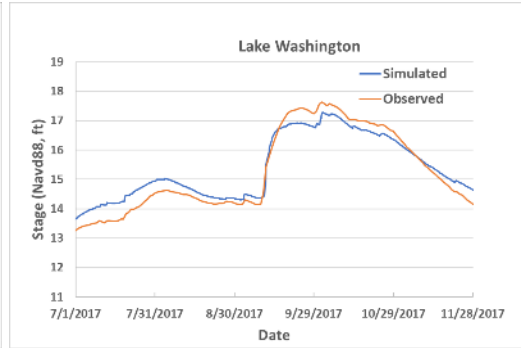

# Model Development

- ▶ Combination of 1D and 2D Overland Flow
- ▶ 2D Surface Region
  - ▶ Land Cover / Land Use
  - ▶ Soil Type
  - ▶ Lidar-based DEM
  - ▶ Nexrad Rainfall
  - ▶ Control Volumes
  - ▶ Weir Features

# Model Calibration – Hurricane Irma 2017

# Peak Stage Comparison – Hurricane Irma

Station Name	Peak Stage (ft, NAVD88)		Difference (Model-Observation)	
	Observation	Model	Stage (ft)	Time (days)
Fort Drum	28.3	28.2	-0.1	0
Blue Cypress Lake	24.5	24.5	0.0	-1
Kenansville Lake	24.8	24.6	-0.2	0
Blue Cypress Water Management Area	24.6	24.5	-0.1	-2
St. Johns Water Management Area	21.8	21.3	+0.1	0
Fellsmere Water Management Area	20.7	20.6	-0.1	-2
Mary A	20.3	19.8	-0.5	0
Three Folks Marsh Conservation Area	19.5	19.2	-0.3	-
Lake Hell'n Blazes	18.8	18.2	-0.6	-1
Lake Washington	17.6	17.2	-0.4	+3
Lake Washington Weir	17.3	17.2	-0.1	-1
Jane Green	34.5	34.3	-0.2	-1
Taylor Creek Reservoir	44.0	43.7	-0.3	0

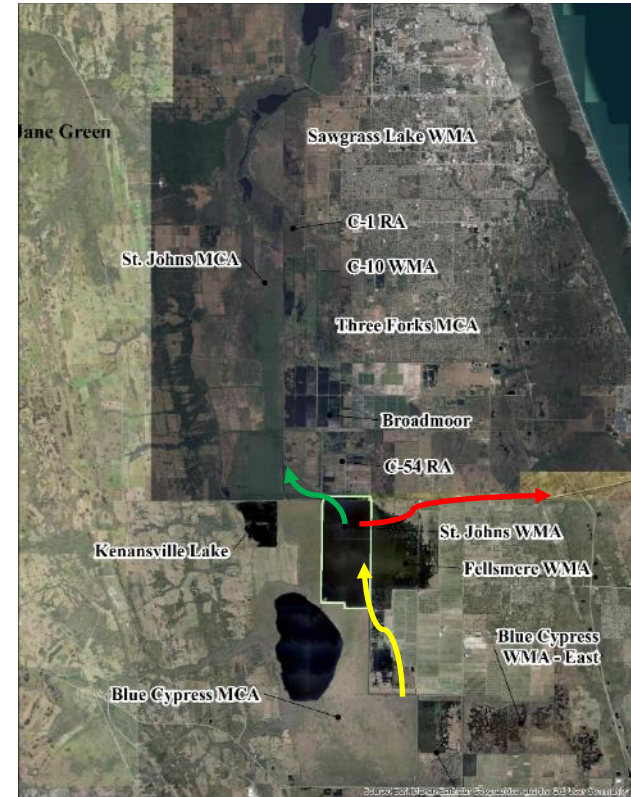

# Local and Regional Flood Assessment

- ▶ System resiliency from rainfall and operation scenarios
- ▶ Flood mapping
- ▶ Conceptual design for flood control and water diversion projects

# Structure Operations

- ▶ Optimize operations for flood mitigation
- ▶ Downstream flood protection

# Environmental and Water Quality Analysis

- ▶ Release to Indian River Lagoon
- ▶ Oxidation of organic soils
- ▶ Predicted vegetation mapping

# Environmental and Water Quality Analysis

- ▶ Release to Indian River Lagoon
- ▶ Oxidation of organic soils
- ▶ Predicted vegetation mapping

# Environmental and Water Quality Analysis

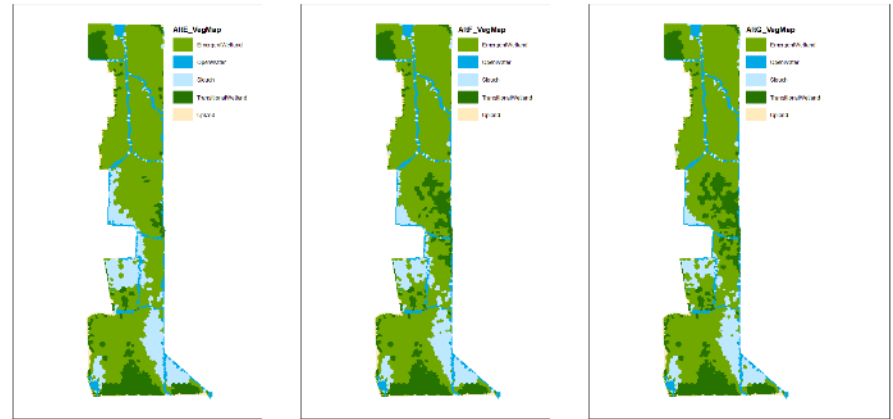

---

- ▶ Release to Indian River Lagoon
- ▶ Oxidation of organic soils
- ▶ Predicted vegetation mapping

# Environmental and Water Quality Analysis

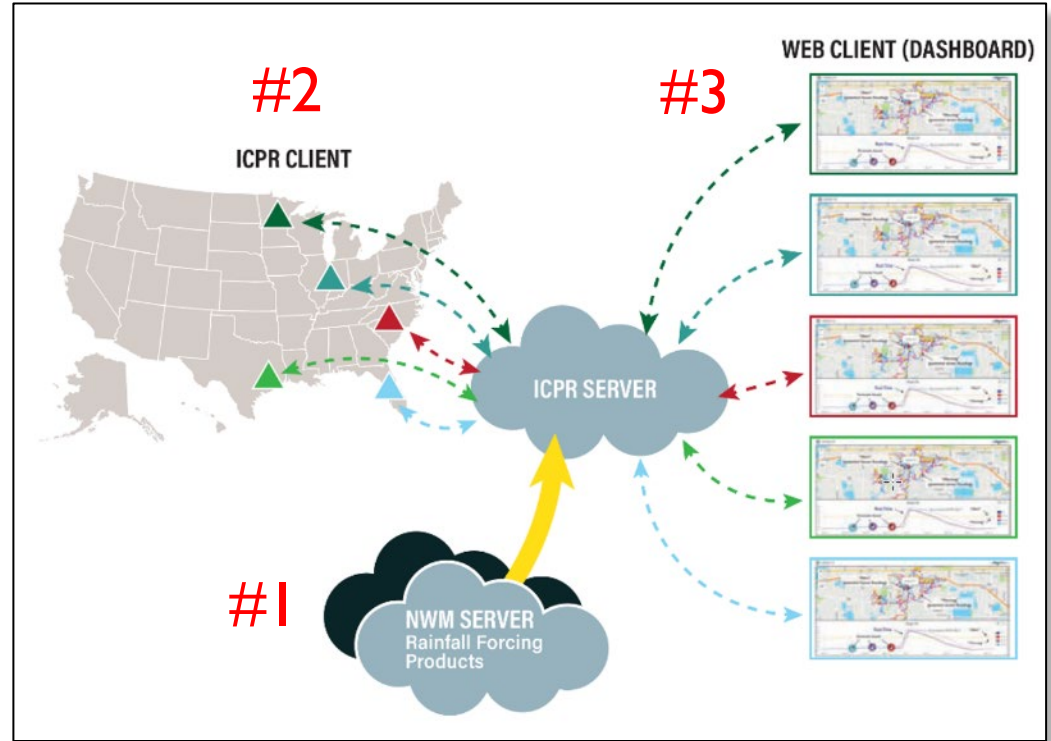

- ▶ Release to Indian River Lagoon
- ▶ Oxidation of organic soils
- ▶ Predicted vegetation mapping

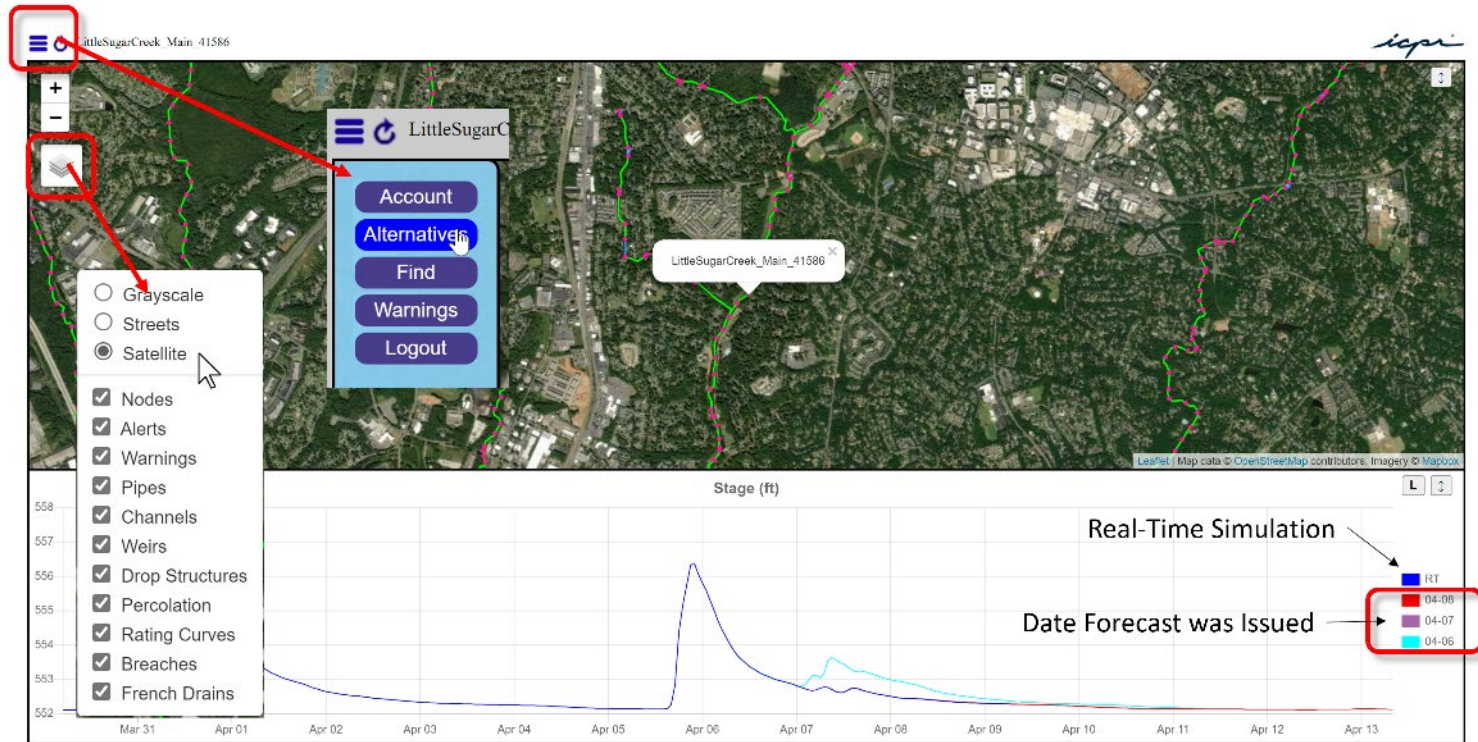

# Real-Time Flood Forecasting (RTFF)

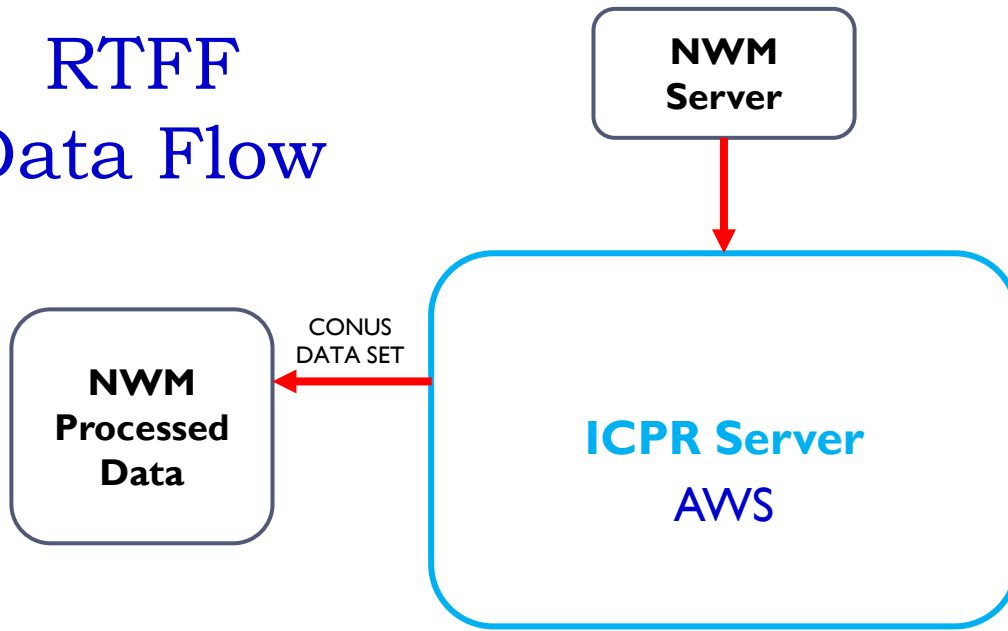

- **Real-Time**
  - ✓ updated hourly
- **Short Range Forecast**
  - ✓ 18-hr forecast
  - ✓ issued every hour
- **Medium Range Forecast**
  - ✓ 10-day forecast
  - ✓ issued every 6 hours

---

- Incorporate observed water levels into the model
- Add ability to modify structure operations during simulations
- Acquire historical NWM data for hindcasting
- Automatically store forecast results
- Download results from dashboard
